CLEANING TIPS

Stainless Steel Bucket

1. Regular Cleaning:

Wash the stainless steel bucket with warm soapy water using a soft sponge or cloth. Rinse thoroughly with water and dry immediately to prevent water spots.

2. Polishing:

For extra shine, polish the stainless steel surface with a stainless steel cleaner or a homemade solution of vinegar and water. Apply with a soft cloth in the direction of the metal grain.

3. Avoid Abrasives:

Never use steel wool or abrasive brushes as they can scratch the stainless steel surface. Stick to non-abrasive tools and cleaners.

4. Handling Stains:

For stubborn stains or fingerprints, use a paste of baking soda and water applied gently with a soft cloth. Rinse and dry as usual.

5. Rust Spots:

If you notice any small rust spots, gently rub them with a paste made from baking soda and water, then rinse and dry. Consider using a stainless steel rust remover for more stubborn rust, following the manufacturer's instructions.

ACACIA WOOD STAND

6. Wiping Down:

Clean the acacia wood stand with a damp cloth and mild dish soap. Avoid soaking the wood in water.

7. Drying:

After cleaning, dry the wood stand immediately with a soft, dry cloth to prevent warping or cracking.

8. Oil Treatment:

Periodically, treat the acacia wood with a food-grade mineral oil or a wood conditioner. Apply a thin layer of oil using a clean, soft cloth, allowing it to soak into the wood to maintain its luster and prevent drying out.

9. Avoid Direct Sunlight:

Store the acacia wood stand away from direct sunlight, as prolonged exposure can fade and weaken the wood.

10. Protect from Heat:

Do not place the wood stand near heat sources like stoves or heaters. Extreme temperatures can cause the wood to warp.

11. Stain Removal:

If the wood gets stained, gently sand the area with fine-grit sandpaper, moving in the direction of the grain, and then reapply a coat of mineral oil.
